

Aim → Create a bot in which to name a student and display enrollment number and marks in three subjects.

Step 1 → open UI Path studio then go to the process option and pop out will come and name the process.

Step 2 → Assign the value to variable 'a' using an assignment operator Here 'a' will represent the enrollment number.

Step 3 → Similarly assign a variable 'b' which represent the marks score in math.

Step 4 → Also assign value to 'p' and 'c' variable, which represent the marks in physics and c-programming.

Step 5 → With the help of message box display the require result by writing it in the message box.
